KNIPEX Tools Offers Electrical Installation Pliers

***8-inch pliers performs six jobs with one hand tool:
cutting, stripping, crimping, gripping, bending and deburring***

ARLINGTON HEIGHTS, Ill. – October 2013 – The electrical installation pliers from [KNIPEX Tools LP](#) performs six tasks in one 8-inch hand tool: cutting, stripping, crimping, gripping, bending and deburring. The installation pliers is fully loaded with the basic functions of five other tools that are essential for electrical installation including side-cutting pliers, long-nose pliers, wire strippers, crimping pliers and cable shears. This pliers, along with a diagonal cutter, are the only tools needed for electrical installation.

The electrical installation pliers feature:

- Induction-hardened cutting edges for cutting copper and aluminum wire up to 9/16-inch stranded or 5/32-inch solid.
- Stripping holes for 12 and 14 American wire gauges.
- Crimp die for 12 to 20 American wire gauges.
- Serrated gripping surfaces and pipe grip for flat and round material.
- Smooth surface near the tips for a non-damaging grip when bending wire loops.
- Clear-cut outside edges for reaming conduit or pipe and for deburring feed-through holes.

“The electrical installation pliers are ideal for electricians who want to carry fewer tools and do installations quickly,” said Alan W. Sipe, president and general manager, KNIPEX Tools. “This tool is the ideal complement to an electrician’s diagonal cutter.”

The multifunction electrical installation pliers features a slim, long-nose design for easy access into tight places and a bolted joint for precision smooth action. Forged from German, high-grade special tool steel, electrical installation pliers are available with plastic-dipped, multicomponent grips or 1000-volt insulated handles.

This unique type of electrical installation pliers from KNIPEX partners with the new KNIPEX X-cut diagonal cutter to help electricians complete installations efficiently.

About KNIPEX Tools

KNIPEX Tools LP is the North American sales and marketing organization of KNIPEX-Werk and is located in Arlington Heights, Ill. KNIPEX-Werk, Wuppertal, Germany, is the largest manufacturer of professional quality pliers in the world, producing up to 65,000 pliers per day, or up to 325,000 pliers each week. The company concentrates its efforts on being the best pliers manufacturer in terms of quality, innovation and efficiency and its pliers satisfy the highest expectations in terms of performance, ergonomics and service life. www.knipex-tools.com
